SUMMARY

- **Frontend Architect & Technical Leader** with 10+ years of experience designing and delivering **scalable, high-performance, and secure applications** across web and mobile platforms.
- Deep expertise in **JavaScript, TypeScript, React, Redux, React Native, and Microfrontend architectures**, with a strong focus on **clean, modular, and maintainable codebases**.
- Proven track record in **architecting enterprise-grade UI/UX solutions**, ensuring **accessibility, cross-browser compatibility, and mobile-first designs** using **Material UI, Tailwind CSS, and modern design systems**.
- Strong background in **engineering excellence**, driving **test automation strategies** (Jest, Cypress), **CI/CD pipelines**, and **static code analysis** (SonarQube) to ensure **high-quality, reliable, and secure releases**.
- Experience in **DevOps practices, cloud infrastructure** (AWS, Docker, Kubernetes), and performance monitoring, enabling seamless deployment and scalability of frontend ecosystems.
- Passionate about **developer experience, performance optimization, and modern frontend tooling**, enabling faster delivery, better maintainability, and long-term scalability.

EDUCATION

Indian Institute of Technology Patna
EMTech in Big Data and Blockchain Development

Sep 2023 – Apr 2025
Patna, Bihar

Biju Patnaik University of Technology
B.Tech in Computer Science and Technology

Mar 2010 – Apr 2014
Rourkela, Odisha

SKILLS

- **Languages:** JavaScript, TypeScript, SQL
- **Web/Mobile:** React, React Native, Node, HTML, CSS
- **Cloud:** AWS, S3, EC2, Lambda, AWS IoT
- **DevOps:** GitHub Actions, Docker, Kubernetes
- **Testing:** Jest, React Test Library, Cypress
- **Concepts:** APIs, Distributed Systems, Agile methods, AR, VR, WebGL, Three.js
- **Tools:** Git, Jira, AWS, Redux, Storybook, Material UI, AG Grid, DOCX, Turborepo, Accessibility, A-frame, Ionic, Cordova

EXPERIENCE

Accenture – Multi Platform Frontend Specialist

July 2024 – Present
Bangalore, India

- **Architected and implemented a reusable UI framework** to visualize and manage **Agentic AI workflows**, enabling seamless representation of complex agent interactions and decision-making stages using **Generative AI** technologies.
- **Designed a backend-driven UI architecture** to dynamically render **LLM (Large Language Model) outputs**, reducing frontend dependency on hardcoded flows and improving **flexibility for new Agentic applications by 60%**.
- Built a **generic visualization layer** for diverse Agentic use cases, including **agent communication flows, multi-step reasoning paths, and contextual data exchanges**, ensuring **scalability across multiple projects**.
- **Standardized a modular component library** with **React, TypeScript, and Tailwind CSS**, making the framework easily integrable across **multiple Agentic applications** with minimal configuration.
- Collaborated closely with **AI engineers and backend teams** to define **API contracts** for real-time Agentic flow updates, ensuring **low-latency rendering** of live AI outputs and improving **user experience consistency**.
- Provided **technical leadership and mentorship** to frontend engineers, **establishing best practices** for building highly scalable, AI-driven interfaces and improving **team delivery velocity by 20%**.

GlobalLogic – Consultant

Feb 2021 – Jun 2024
Bangalore, India

- **Led and mentored an 8-member cross-functional team** (frontend, backend, QA, DevOps) through the **entire product lifecycle**, improving **delivery efficiency by 25%** and fostering a **high-performance, collaborative culture**.
- **Architected and optimized application design**, refactoring legacy codebases into **modular, scalable, and reusable components**, reducing **page load time by 30%**.
- **Integrated SonarQube Static Code Analysis into CI/CD pipelines**, improving **code quality scores by 35%**, reducing security vulnerabilities, and enforcing **frontend coding standards across the team**.
- **Established Unit and Integration Testing frameworks** (Jest, React Testing Library, Cypress) within CI pipelines, achieving **85%+ test coverage**, cutting **regression cycles by 50%**, and ensuring **stable bi-weekly releases**.

- **Designed and implemented a Monorepo architecture** for multiple frontend applications using **Turborepo**, improving **build times by 40%** and **simplifying dependency management** across microfrontends.
- **Collaborated with product owners and stakeholders** to define technical roadmaps, prioritize performance optimization, and ensure alignment with business goals.

L&T Technology – Senior Software Engineer

Feb 2019 – Feb 2021

Mysore, India

- **Architected and delivered a Bluetooth + Wi-Fi + Cloud-enabled IoT mobile application** (“Dometic Interact”) for remote monitoring & control of caravan appliances (AC, heater, lights, fans), enabling **40% more reliable device connectivity** and **reducing user intervention time**.
 - Designed a multi-mode communication stack (BLE, Wi-Fi, Cloud) with WebSocket and ESP32 BLE integration, ensuring seamless transitions between local and remote control modes.
 - Developed a custom microcontroller communication protocol for ESP32, ensuring low-latency data transmission between the app and IoT devices.
- Built **InnerView**, a **3D visualization tool for Halliburton (Oil & Gas industry)** to inspect and interactively explore **pipe deposition data in 3D** (zoom, slice, rotate, move inside pipe).
- Acted as a **technical mentor for junior developers**, introducing best practices for **performance optimization, modular code architecture, and 3D graphics rendering** using **React, redux** ecosystem.

Zool Technology – Software Engineer

Feb 2015 – Jan 2019

Bangalore, India

- Developed and maintained **responsive web applications**, ensuring cross-browser and cross-device compatibility.
- Built dynamic and user-friendly interfaces with **HTML, CSS, and JavaScript**.
- Integrated **third-party APIs and libraries**, enhancing functionality and improving user experience.

PROJECTS

Name: Diligent Minutes

Mar 2024

Role: Team Lead

- Developed a real-time collaboration feature for a meeting minutes application, leveraging socket connections for event capturing with CKEditor backend.
- Enhanced editor functionality by adding tools such as pen, highlighter, link insertion, and list creation.
- Created a Node.js microservice to convert HTML documents into Word format templates.
- Tools: *React, Redux, Storybook, Material UI, Node.js, Jest, Cypress, Docker, GitHub Action.*

Name: One Airtel

Jul 2023

Role: Sr. Frontend Developer

- Contributed to the development of a bundling and cross-sell platform that unified Airtel's Postpaid, Broadband, and DTH accounts under a single connection.
- Tools: *React, Redux, TypeScript, Jest, HTML, CSS.*

Name: Interact Hub

Sept 2021

Role: Sr. Frontend Developer

- Developed a mobile application for remote control and monitoring of caravans using Cloud, Bluetooth, and WiFi communication.
- Tools: *React Native, Node.js, Redux, AWS IoT, Serverless.*

Name: Inner View

Mar 2021

Role: Sr. Frontend Developer

- Designed and implemented a 3D visualization solution for oil pipeline deposits, with features like zooming, slicing, and rotating for detailed inspection.
- Tools: *WebGL, Three.js, A-Frame, Angular.*

ADDITIONAL INFORMATION

- **Proficient in Scrum methodology** for effective project management and teamwork.
- Experienced in using **AWS services** to build cloud-based solutions with enhanced scalability and security.
