SUMMARY

Senior Software Engineer with 11+ years of experience building web, mobile, and AI-powered products. Skilled in full-stack architecture, Agentic AI and scalable cloud systems, with a strong track record of taking products from concept to production and leading engineering teams.

Role Frontend Architect

Experience 11+ years

Team led 8+ engineers

Core stack React · TypeScript · Node.js · AWS

AI stack Agentic AI · LangChain · RAG

EDUCATION

Indian Institute of Technology Patna

MTech in Big Data and Blockchain Development

Sep 2023 – Apr 2025

Patna, Bihar

Biju Patnaik University of Technology

B.Tech in Computer Science and Technology

Mar 2010 – Apr 2014

Rourkela, Odisha

SKILLS

- **AI & Agentic Systems:** Agentic AI, LangChain, RAG, Claude Skills & Plugins
- **Fullstack Web:** HTML5, CSS3, JavaScript, TypeScript, React.js, Redux, Node.js, Express.js, GraphQL
- **Data & Cloud:** PostgreSQL, MySQL, MongoDB, AWS, AWS IoT
- **Mobile:** React Native, Ionic, Android, iOS
- **Testing & CI/CD:** Jest, Cypress, Playwright, Postman, GitHub Actions, SonarQube, Docker, Kubernetes
- **3D & Graphics:** Three.js, WebGL, D3.js
- **Leadership:** Team Management, Agile/Scrum, Sprint Planning, Architecture & Design

EXPERIENCE

Accenture – Fullstack LLM development specialist

Jul 2024 – Present

Bengaluru, India

- Embedded with **Ford's unified billing system** team, driving **Agentic AI** adoption across their **SDLC** to accelerate delivery.
- Architect reusable UI frameworks for **Agentic AI workflows (LangChain, RAG, LLM integration)** — led flagship builds including a **product recommender for BMW** — improving new-app integration effort by **60%**.
- Convert applications into reusable **Claude Skills and plugins**; mentor frontend engineers on AI-driven interfaces, lifting **team delivery velocity by 20%**.

GlobalLogic – Consultant

Feb 2021 – Jun 2024

Bengaluru, India

- **Led and mentored an 8-member cross-functional team** through the full product lifecycle, improving **delivery efficiency by 25%**.
- Architected application design and **CI/CD** quality gates (**SonarQube**, automated testing), cutting **page load time 30%** and **regression cycles 50%** while reaching **85%+ test coverage**.
- Built a **Turborepo** monorepo across microfrontends, simplifying dependency management and improving codebase consistency.

L&T Technology – Senior Software Engineer

Feb 2019 – Feb 2021

Mysore, India

- Architected a **Bluetooth/Wi-Fi/Cloud-enabled IoT** mobile app (“Dometic Interact”) and a **WebGL/Three.js 3D** pipeline-visualization tool for Halliburton (Oil & Gas).
- Mentored junior developers on performance optimization and 3D graphics rendering.

Zool Technology – Software Engineer

Feb 2015 – Jan 2019

Bengaluru, India

- Built and maintained responsive, cross-browser web applications with **HTML, CSS, and JavaScript**, integrating third-party APIs.

AWS

Kubernetes
